Primary School

### Home Learning

All children in Reception have taken home an exercise book with their login to e-Schools. Every week we will set home learning challenges on here for the children to complete. It would be lovely if you could complete these with your child and send us a comment or photograph. Please keep your login details safe.

### Phonics

Every day your child will be having a phonics session where we introduce Set 1 sounds. When your child has learnt to recognise the first few sounds we begin reading simple words using these. As your child begins to read words we will send home a reading book.

### Reading

Every week your child will have the opportunity to choose a library book to take home. This book is for your child to share with an adult or older sibling. You can read the book together and talk about the story or the pictures.

### Wellbeing

The coronavirus (COVID-19) pandemic has brought many new and unexpected challenges to children's mental health and wellbeing. In the current climate, it is more important than ever that we support children's mental health. We will be ensuring that there are opportunities for children to share their feelings and concerns built into everyday practice. In order to address any learning that has been missed, we will use focussed interventions to target children's gaps taught from previous year groups.

### P.E.

Physical development is an important part of the Early Years Curriculum and supports children at this age with other developing others skills. Every Friday the children will have a P.E lesson. The children will need to come into school in their kit every Friday.

## Reception Curriculum Leaflet Autumn 2 Term

In this leaflet you will find out about what your child will be learning during this term and how you can help them at home.

It gives you information about what is going to be taught in all areas of the curriculum in school and suggests some ways in which you can get involved and help out at home.

We see this as a great opportunity for you to share in your child's education.

On the back page you will find further information regarding what to expect each week.

Thank you for your support!

Reception Staff

Mrs Skilton-Yates

Miss Sidhu

## Autumn 2

This half term is always a fun half term in Reception, with lots of celebrations this time of year. We will continue to spend time supporting children in adjusting to the daily routine and making relationships with adults and other children. Every day we have a maths lesson followed by a phonics session. During the rest of the day we explore the different areas of our curriculum linked to a book which we will read together.

We have listed the topics and themes we will explore each week below and suggested some ways you can support your child at home.

## SMART Maths

In Maths lessons we will be following the SMART Maths approach. We will practise counting amounts and finding the correct number to match and then moving on to find one more or one less than a group of objects. We will also be learning how to use positional language such as above, below and next to move and describe the position of objects. We will continue, create and describe patterns with objects, shapes or colours.

At home you could support your child in Maths by practising counting up to 10 and then 20. You could count the stairs, pasta, socks or even toys! When you are out or in the garden you could challenge your child to find you a set number of objects, for example three sticks or six leaves.

Encourage your child to look for numbers when you are out and talk about what they are used for.

Play games where you describe where to hide or where you have hidden something and ask your child to find it.

2<sup>nd</sup> November

‘Hovis the Hedgehog,’

by Lynda Leigh-Crawford.

This is a lovely little story about a hedgehog who gets a little confused on Bonfire Night. The children will be making lots of Bonfire Night inspired art this week and learning about fire safety. At home maybe you could keep an eye out when it gets dark for any fireworks, maybe you could create your own artwork at home.

9<sup>th</sup> November

‘Shubh Diwali,’

by Chitra Soundar.

We are reading a story called ‘Shubh Diwali,’ this is all about how families celebrate Diwali. We will be listening to music and exploring movements, making diya lamps and creating rangoli patterns using coloured rice. At home you could talk about special events you celebrate at home with your family. You could also look at some old photographs of these special times.

16<sup>th</sup> November

Nursery Rhyme Week

We will be learning a new nursery rhyme every day this week and exploring them through lots of different activities. At home you could learn a Nursery Rhyme together; maybe you could make your own actions or change some of the words to make your own!

23<sup>rd</sup> November

Child Led Week

This week we will be learning about a topic chosen by the children. We will share the topic with you nearer to the time.

30<sup>th</sup> November to 14<sup>th</sup> December

‘Father Christmas comes up Trumps,’

by Nicholas Allan.

A funny Christmas story packed full of language to enjoy the season. Over the next few weeks we will be making lots of crafts and talking about how we all celebrate Christmas. We will even be writing a wish list to Santa himself!
